Portfolio

SUMMARY

Experienced Front-End Developer with expertise designing, developing, and deploying modern, responsive, and scalable web applications using React, Next.js, JavaScript (ES6+), HTML5, CSS3, and React Native. Strong background building intuitive user interfaces, integrating RESTful APIs, optimizing application performance, and delivering seamless user experiences across desktop and mobile platforms.

Skilled in translating UI/UX designs into reusable, maintainable component-based architectures while following accessibility (WCAG), SEO, and modern front-end best practices. Experienced collaborating with cross-functional teams in Agile environments, managing deployments, and delivering production-ready applications that improve user engagement and business outcomes.

EDUCATION

Memorial University of Newfoundland

Bachelor of Arts, Sociology, Minor in Business Administration

EXPERIENCE

Front-End Developer

September 2023 – August 2025

Wailo – Gamer's Lair

Calgary, AB / Remote

Environment: React Native, JavaScript, REST APIs, Git, GitHub, Node.js, Mobile Development, Agile

- Developed scalable, production-ready mobile applications using React Native for both iOS and Android platforms.
- Designed and implemented secure authentication features including login, registration, account management, password recovery, and deep-link navigation.
- Built reusable UI components that improved development efficiency, consistency, and maintainability across the application.
- Integrated RESTful APIs to deliver reliable real-time data while implementing loading states, validation, and error handling.
- Collaborated closely with backend developers to optimize API communication and improve application performance.
- Enhanced user experience through responsive layouts, accessibility improvements, and UI refinements based on user feedback.
- Participated in Agile ceremonies including sprint planning, stand-ups, retrospectives, and peer code reviews.
- Performed QA testing, debugging, and issue resolution to ensure production stability.
- Supported Apple App Store release management, testing, and deployment activities.
- Designed and deployed a responsive landing page that improved online visibility and customer acquisition.

Front-End Web Developer & Digital Marketing Intern

Mode Law

May 2026 – June 2026

Toronto, ON

Environment: HTML5, CSS3, JavaScript, Vercel, Git, Hostinger, SEO, Google Ads

- Designed and developed a fully responsive nine-page corporate website using semantic HTML5, CSS3, and modern JavaScript.
- Built reusable layouts and modular UI components that improved scalability and maintainability.
- Implemented advanced responsive design using CSS Grid, Flexbox, CSS variables, clamp, and modern styling techniques.
- Optimized page performance through semantic markup, image optimization, and efficient asset loading.
- Successfully migrated the production website from Webflow to Vercel while managing DNS configuration through Hostinger with zero downtime.
- Improved search engine rankings through technical SEO, metadata optimization, structured content, and performance enhancements.
- Configured Google Business Profile and managed Google Ads campaigns to increase online visibility and client acquisition.
- Worked directly with stakeholders to gather requirements, iterate on feedback, and deliver production-ready solutions.
- Ensured cross-browser compatibility and accessibility across desktop, tablet, and mobile devices.

Front-End Web Developer

CENTRA NL (Centra Cultural Collective Inc.)

March 2026 – May 2026

St. John's, NL

Environment: HTML5, CSS3, JavaScript, Responsive Design, UI Development

- Designed and developed a fully responsive multi-page organizational website supporting artists, entrepreneurs, and community initiatives.
- Built a searchable directory containing over 68 business and artist profiles with structured categorization and tagging.
- Created reusable components and standardized layouts that maintained consistent branding across the platform.
- Improved website navigation and information architecture to enhance user experience and content discoverability.
- Managed digital brand assets including typography, logos, photography, and marketing materials.
- Worked collaboratively with project stakeholders to translate business requirements into engaging digital experiences.
- Maintained responsive performance and cross-browser compatibility throughout development.

PROJECTS

Canada Business Lead Generator | Python | Google Maps API | Data Processing

- Developed an automated lead generation platform that collected and organized business information from Google Maps and publicly available online sources across Canada.
- Built Python scripts to extract, clean, classify, and manage thousands of business records.
- Integrated Google Maps APIs to retrieve business names, addresses, websites, contact information, and categories.

- Created an interactive dashboard that segmented businesses into organizations with existing websites and those requiring web development services.
- Automated lead qualification, significantly reducing manual prospecting time while improving outreach efficiency.

CERTIFICATIONS

Product Design – Google (Coursera), 2024

Web Development – IBM SkillsBuild, 2026

Project Management – IBM SkillsBuild, 2026

TECHNICAL SKILLS (CATEGORIZED)

Programming & Front-End: HTML5, CSS3, JavaScript (ES6+), TypeScript, Python, React.js, Next.js, React Native UI

Development & Design: Tailwind CSS, Bootstrap, Sass (SCSS), CSS Modules, Styled Components, CSS Grid, Flexbox,

Responsive Web Design, Progressive Web Apps (PWA), Figma, Adobe XD, Adobe Photoshop, Adobe Illustrator, Design

Systems, Wireframing, Prototyping Application Development: Node.js, Express.js, REST APIs, Fetch API, Axios, JSON,

React Hooks, Context API, Redux Toolkit, Authentication, Component-Based Architecture Performance & Quality: SEO,

Core Web Vitals, Lighthouse Optimization, Accessibility (WCAG), Lazy Loading, Code Splitting, Image Optimization,

Cross-Browser Compatibility, Performance Optimization DevOps & Deployment: Git, GitHub, GitHub Actions, Vercel,

Netlify, Hostinger, CI/CD Pipelines, DNS Management Methodologies: Agile, Scrum, Test-Driven Development (TDD), Version Control, Code Reviews, SDLC, UI/UX Best Practices

CORE COMPETENCIES

Modern JavaScript (ES6+) • React Development • Next.js • React Native • Component-Based Architecture • Responsive

Web Design • Mobile-First Development • REST API Integration • UI/UX Development • Accessibility (WCAG) • SEO Optimization • Front-End Performance Optimization • Cross-Browser Compatibility • Design Systems • Agile Development • Git Version Control • CI/CD • Cloud Deployment
